

MORA

Your restaurant's voice, powered by AI — meet Mora

WHAT IS MORA?

- Every missed call during a rush is a lost order — Mora answers it
- Mora takes the full order, handles modifications, and sends it directly to your POS
- Your staff stays focused on in-person guests — not the phone
- Purpose-built for restaurants like yours — not a generic AI tool

BENEFITS

24/7 AVAILABILITY

Never miss a call, even during your busiest rush.

SCALABILITY

Handles multiple calls at once during peak hours

CONSISTENCY

Same great experience for every caller, every time

COMPLEX MENU HANDLING

Custom modifications, variants, and special requests — handled accurately every time.

DATA COLLECTION & INSIGHTS

Know your best sellers, peak times, and order trends

CALL TO KITCHEN: THE END-TO-END CUSTOMER JOURNEY

Inbound Call Handling

- The AI agent automatically answers incoming calls, allowing staff to stay focused on in-store operations.

FAQ Handling

- Provides answers to common questions such as hours of operation or menu details.

Order Placement

- Effortlessly takes orders, supports substitutions, and suggests popular items.

Order Confirmation

- Repeats the final order back to the customer, ensuring accuracy and clarity.

Pickup Details

- Collects the customer's name and confirms payment will be handled upon arrival.

POS Integration

- Automatically sends the finalized order to the POS system so the kitchen can begin prep immediately.

REVENUE IMPACT & INVESTMENT ANALYSIS

Tier 1	Tier 2	Tier 3	Tier 4
\$99	\$149	\$199	\$249
/month	/month	/month	/month
150 min included	300 min included	475 min included	650 min included
\$0.20/min overage	\$0.20/min overage	\$0.20/min overage	\$0.20/min overage

- Average restaurant order call runs 3-5 minutes
- Overage only applies past your included minutes, no surprise caps

❖ Missed Calls = Lost Sales

- Restaurants miss an estimated 43% of incoming calls (Breez, Feb 2025 study)
- Average takeout order value: \$38 (2025 Diner Trends Report)
- Even one extra order a day adds up — at the average \$38 ticket, that's \$1,140 a month in new revenue, often several times what any MORA tier costs.

❖ Investment

- \$99-\$249/month depending on tier, plus \$0.20/min overage only if you exceed included minutes
- Even in a conservative scenario, MORA pays for itself many times over each month

ESTIMATE YOUR MISSED REVENUE

- How many phone calls do you receive per day?
→ _____
- How many go unanswered? (Avg. 43% missed calls)
→ _____ x 0.43 = ____
- What is your average order value?
→ \$_____
- How much revenue might you be missing daily?
Low estimate (missed calls x \$Low Order Avg)
→ _____
High estimate (missed calls x \$High Order Avg)
→ _____
- Daily missed revenue × 30 = \$_____ per month

GETTING STARTED

We Handle Everything

- Forward your existing number to MORA
- We sync with your POS
- Go live — usually within 72 hours

A close-up, high-angle shot of a silver-colored metal padlock resting on a brown printed circuit board (PCB). The padlock is oriented vertically, with its shackle at the top. The PCB is densely packed with intricate circuitry, including various traces, pads, and small components. The lighting is soft, highlighting the metallic texture of the padlock and the matte finish of the PCB. The overall composition suggests themes of security, technology, and data protection.

DATA & SECURITY

- ❖ Built on enterprise-grade infrastructure with industry-standard encryption
- ❖ Customer data is never sold or shared with third parties
- ❖ Conversation logs are stored securely and accessible only to you

A waiter in a white shirt and sunglasses is holding a tablet, likely taking an order. The background shows a restaurant interior with tables, chairs, and a brick wall. The text "NEVER MISS A CALL. NEVER MISS A CUSTOMER." is overlaid on the image.

NEVER MISS A CALL. NEVER MISS
A CUSTOMER.

CALL TO KITCHEN: THE END-TO-END CUSTOMER JOURNEY

REVENUE IMPACT & INVESTMENT ANALYSIS

AI Call Handling Costs	
Daily Call Volume	Estimated AI Cost
20	\$12
40	\$24
60	\$36
80	\$48

- Average restaurant call lasts 3 minutes.
- The AI Voice Agent costs \$0.20 per minute.
- Total cost per call on average is about: ~ \$0.60

❖ Missed Calls = Lost Sales

- On average, 22% of calls go unanswered (~41 calls)
- Average order size (San Diego): \$8–\$30.
- Lost Revenue Potential
 - Daily: \$329–\$1,234
 - Monthly: **Thousands** in missed orders

❖ Investment

- \$99 - \$199/Month + Overage – Most restaurants don't hit overage
- Your Investment < One day of lost revenue

ESTIMATE YOUR MISSED REVENUE

- How many phone calls do you receive per day?
→ _____
- How many go unanswered? (Avg. 22% missed calls)
→ _____ x 0.22 = ____
- What is your average order value?
→ \$_____
- How much revenue might you be missing daily?
Low estimate (missed calls x \$Low Order Avg)
→ _____
High estimate (missed calls x \$High Order Avg)
→ _____
- Daily missed revenue × 30 = \$_____ per month
